Upload Your First Beat

Add your first beat and configure the information customers need to browse and license it. Follow the steps below and compare each screen with the current version of your BeatKongs producer dashboard.

Step-by-step instructions

1. Open Add Beat

From the dashboard choose Music → Add Beat.

complete Details and Media, configure licenses, save and view the beat. Replace this preview image with the real BeatKongs YouTube embed once the video is ready.

4. Choose Free or Paid licensing

In the Licenses tab, select the intended beat type. Free beats use a Free Beat license; paid beats can offer Basic, Premium, Unlimited, and Exclusive licenses.

5. Review price and delivery settings

For every enabled paid license, review its price, contract template, and delivery file. Ensure each file is the correct version for that license.

6. Review SEO and advanced options

Open SEO, Advanced, and Custom Fields as needed. You can return to optional settings after the core beat information is complete.

7. Save and confirm

Save the beat and check Music → Manage Beats. A saved beat counts toward your plan’s beat limit; incomplete unsaved drafts do not.

8. Test the customer experience

Open your live site, find the beat in the Beat Browser, and check that playback and license selection behave correctly.

Important: A beat counts toward your plan limit once saved; deleting a beat frees a slot.

If something does not look right

Check that you are signed in to the correct producer account and that your plan includes the feature. Save any changes, refresh the relevant page, and compare it with the screenshots in this guide. If the problem continues, use the BeatKongs Help Center to submit a support ticket with the page name, the action you tried, the error message, and a screenshot. Never include passwords, API keys, or payment credentials.
