Select Your First Website Theme

Pick a starting design that fits your producer brand and can be customized in Kong Builder. Follow the steps below and compare each screen with the current version of your BeatKongs producer dashboard.

Step-by-step instructions

1. Open the Themes page

From the producer dashboard, select Website → Themes.

image URL with your actual BeatKongs screenshot before publishing.

2. Preview available themes

Use the available preview or demo action to explore each design. Review its navigation, beat presentation, typography, and mobile layout before choosing.

3. Choose a theme for your brand

Select the theme whose overall layout is closest to the site you want. You can refine colors, images, text, and sections later in Kong Builder.

Screenshot to replace: Theme card with selection control. Replace the image URL with your actual BeatKongs screenshot before publishing.

4. Confirm the active theme

Follow the on-screen apply or selection flow. If prompted about replacing content or settings, read the message carefully and back up existing work before proceeding.

5. Open your website

Use View Live Website and verify the theme displays correctly. If a demo navigation link behaves unexpectedly, report it rather than manually editing system paths.

Important: If you already customized a theme, back up your work before applying another theme.

If something does not look right

Check that you are signed in to the correct producer account and that your plan includes the feature. Save any changes, refresh the relevant page, and compare it with the screenshots in this guide. If the problem continues, use the BeatKongs Help Center to submit a support ticket with the page name, the action you tried, the error message, and a screenshot. Never include passwords, API keys, or payment credentials.
