How to Display Reviews on Your Website

What to know

Reviews can be surfaced through the site experience where the theme or builder offers a supported reviews component.

Steps

1. Inspect your Kong Builder blocks or current theme for a reviews display option.
2. Place or enable it only if available.
3. Save and verify the public page with a real approved test submission.

> **Review note:** This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
