How to View and Respond to Questions

What to know

The Questions area is under Feedback. Response controls must be confirmed in the current interface.

Steps

1. Open Feedback → Questions.
2. Inspect the relevant question and available response actions.
3. Verify whether the customer receives a response or notification before relying on that workflow.

Review note: This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
