Understanding Your Website Settings

What to know

Website settings include site identity and configuration areas such as SEO, domains, email templates, and integrations.

Steps

1. Open Settings in the producer dashboard.
2. Identify the specific setting you need before editing it.
3. Save changes and verify their effect on the published storefront.

Review note: This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
