How to Update Your Website Information

What to know

Producer profile and website information may be configured in different Settings sections.

Steps

1. Open Settings → Profile Settings for producer profile details.
2. Inspect the website-related settings available for site identity.
3. Save and verify the public-facing text or details that changed.

Review note: This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
