How to Configure Your Storefront SEO

What to know

BeatKongs provides Settings → SEO and page-level SEO controls.

Steps

1. Open Settings → SEO to inspect global SEO options.
2. For a specific page, open its editing interface and locate page SEO fields.
3. Update only fields present and verify the published page metadata.

Review note: This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
