How to Edit Page Titles and Descriptions

What to know

SEO titles and descriptions are intended to describe the individual page accurately.

Steps

1. Open Website → Pages and select the page to edit.
2. Find the SEO title and description settings for that page.
3. Save and inspect the published page metadata rather than relying on builder preview alone.

Review note: This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
