Understanding Search Engine Visibility

What to know

Search engine discovery depends on public access, crawl settings, page metadata, and indexing by search engines.

Steps

1. Check that the page is publicly accessible and not intentionally hidden from search.
2. Review Settings → SEO and page-level SEO controls.
3. Remember that indexing is controlled by search engines and is not guaranteed immediately.

Review note: This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
