# How to Configure Your BeatKongs Subdomain

## What to know

Producer sites use BeatKongs subdomains, with custom domains offered according to plan entitlement.

## Steps

1. Open Settings → Domain & SSL.
2. Review the subdomain shown for your workspace and any available edit options.
3. Save only supported changes and verify the public address after propagation.

> **Review note:** This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

## Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
