Understanding Custom Domain Plan Restrictions

What to know

BeatKongs plan settings control whether custom domains are available. Producer subdomains are a separate domain option.

Steps

1. Open Account → Change Plan and review the available domain features.
2. If Custom Domain is disabled for the plan, do not assume the domain can be activated.
3. Check downgrade effects before changing plans.

> **Review note:** This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
