Understanding the Integrations Page

What to know

Settings → Integrations is the producer dashboard location for supported integrations. Availability varies by implementation and plan.

Steps

1. Open Settings → Integrations.
2. Review only integrations actually listed and available in the current workspace.
3. Complete the provider-specific connection steps shown there and verify the integration before using it with customers.

Review note: This article is based on BeatKongs product decisions and known dashboard sections. Confirm exact labels and feature availability in the current interface before publishing.

Need help?

If the described option is missing, record the affected page, your workspace, and the expected behavior. Use the Report Issues option in your producer dashboard to contact BeatKongs Support.
