How to Select and Edit Website Elements

Learn how to Select and Edit Website Elements in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Click the element you want to change directly on the canvas.

> SCREENSHOT TO ADD: Screenshot needed: Selected text element and floating action controls

Screenshot to capture: Selected text element and floating action controls.

2. **Step 2.** Check the selection outline and floating action toolbar to confirm the correct element is selected.
3. **Step 3.** Use the right-side settings for that element; choose Content for its text or media, Style for appearance, and Advanced for supported layout options.

> SCREENSHOT TO ADD: Screenshot needed: Content, Style and Advanced tabs for the selected element

Screenshot to capture: Content, Style and Advanced tabs for the selected element.

4. **Step 4.** Save and preview the result; undo if you selected the wrong element.

> SCREENSHOT TO ADD: YouTube demo thumbnail needed: How to Select and Edit Website Elements

YouTube demo to record (2–4 minutes): How to Select and Edit Website Elements. Show the full sequence in the steps above; replace this thumbnail with the real YouTube embed when ready.

Important: Changes can affect other elements or screen sizes. Review the result on both desktop and mobile before you consider the task finished.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues
