Understanding Content, Style & Advanced Settings

Learn how content, style & advanced settings works in the BeatKongs website editor. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Select a heading, button or image on the canvas.

> SCREENSHOT TO ADD: Screenshot needed: Heading Content tab

Screenshot to capture: Heading Content tab.

2. **Step 2.** Open Content and identify the fields that change the element’s content or destination.
3. **Step 3.** Open Style and review color, typography and appearance controls that apply to that element.

> SCREENSHOT TO ADD: Screenshot needed: Same heading Style and Advanced controls

Screenshot to capture: Same heading Style and Advanced controls.

4. **Step 4.** Open Advanced only when you need layout, responsive or other advanced behavior; save and verify.

Important: Content controls what appears, Style controls how it looks, and Advanced holds more technical layout options.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
