How to Add Design Blocks and Modules

Learn how to Add Design Blocks and Modules in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Open the Add interface and locate the design blocks or modules collection.

> SCREENSHOT TO ADD: Screenshot needed: Block/module picker with categories visible

Screenshot to capture: Block/module picker with categories visible.

2. **Step 2.** Choose a block for page layout or a module for specific functionality.
3. **Step 3.** Insert it and inspect its content and style settings.

> SCREENSHOT TO ADD: Screenshot needed: Newly inserted module and its editing panel

Screenshot to capture: Newly inserted module and its editing panel.

4. **Step 4.** Replace sample content and test any interactive behavior on the live website.

> SCREENSHOT TO ADD: YouTube demo thumbnail needed: How to Add Design Blocks and Modules

YouTube demo to record (2–4 minutes): How to Add Design Blocks and Modules. Show the full sequence in the steps above; replace this thumbnail with the real YouTube embed when ready.

Important: Changes can affect other elements or screen sizes. Review the result on both desktop and mobile before you consider the task finished.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
