How to Change Fonts and Typography

Learn how to Change Fonts and Typography in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Select the text element and open its Style or typography controls.

> SCREENSHOT TO ADD: Screenshot needed: Typography controls in Style

Screenshot to capture: Typography controls in Style.

2. **Step 2.** Review font family, weight, size and line height, where available.
3. **Step 3.** Make one change at a time and compare the result on desktop and mobile.

> SCREENSHOT TO ADD: Screenshot needed: Same text before and after font adjustment

Screenshot to capture: Same text before and after font adjustment.

4. **Step 4.** Check contrast and readability, then save.

Important: Changes can affect other elements or screen sizes. Review the result on both desktop and mobile before you consider the task finished.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
