How to Customize Buttons and Links

Learn how to Customize Buttons and Links in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Select the button or linked element in the Builder.

> SCREENSHOT TO ADD: Screenshot needed: Button Content tab showing label and destination

Screenshot to capture: Button Content tab showing label and destination.

2. **Step 2.** In Content, review the label and destination URL or page selection.
3. **Step 3.** In Style, adjust available colors, corners, typography and spacing.

> SCREENSHOT TO ADD: Screenshot needed: Button Style tab and live clickable button

Screenshot to capture: Button Style tab and live clickable button.

4. **Step 4.** Save and click the button on the live website to confirm the destination works.

Important: A button can look correct in the Builder but still point to an incorrect destination.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
