How to Adjust Image Size, Alignment and Alt Text

Learn how to Adjust Image Size, Alignment and Alt Text in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Select an image and open its Style or image settings.

> SCREENSHOT TO ADD: Screenshot needed: Image size/fit controls and alt-text field if available

Screenshot to capture: Image size/fit controls and alt-text field if available.

2. **Step 2.** Review size, fit, alignment and responsive width controls that appear for this image.
3. **Step 3.** Use the alt-text field, if provided, to describe informative imagery; leave decorative images appropriately empty.

> SCREENSHOT TO ADD: Screenshot needed: Same image at desktop and mobile widths

Screenshot to capture: Same image at desktop and mobile widths.

4. **Step 4.** Preview on a phone and check for stretching or cropped important details.

Important: Changes can affect other elements or screen sizes. Review the result on both desktop and mobile before you consider the task finished.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
