How to Add Videos to Your Website

Learn how to Add Videos to Your Website in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Select a video module or the existing video element on the page.

> SCREENSHOT TO ADD: Screenshot needed: Video source field in selected video component

Screenshot to capture: Video source field in selected video component.

2. **Step 2.** Choose the supported video source and enter the required URL or media reference.
3. **Step 3.** Review poster image and display settings where available.

> SCREENSHOT TO ADD: Screenshot needed: Embedded video on live page

Screenshot to capture: Embedded video on live page.

4. **Step 4.** Save and test playback on desktop and mobile; verify permissions on the video host.

Important: Changes can affect other elements or screen sizes. Review the result on both desktop and mobile before you consider the task finished.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
