How to Change Global Website Colors

Learn how to Change Global Website Colors in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Open Global and locate the site-wide color controls.

> SCREENSHOT TO ADD: Screenshot needed: Global color palette controls

Screenshot to capture: Global color palette controls.

2. **Step 2.** Identify the colors used for backgrounds, headings, links and accents where exposed.
3. **Step 3.** Update one color and inspect multiple pages and modules.

> SCREENSHOT TO ADD: Screenshot needed: Two different pages after one global color change

Screenshot to capture: Two different pages after one global color change.

4. **Step 4.** Check contrast and save after confirming the change did not affect unintended components.

Important: Global color edits can affect more than one page; inspect the whole site.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
