How to Customize Global Buttons and Forms

Learn how to Customize Global Buttons and Forms in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Open Global and locate button or form design controls where available.

> SCREENSHOT TO ADD: Screenshot needed: Global button and form settings

Screenshot to capture: Global button and form settings.

2. **Step 2.** Review the defaults for color, shape, typography and field appearance.
3. **Step 3.** Change one default and check existing buttons or forms on multiple pages.

Screenshot to capture: Live button and form after style update.

4. **Step 4.** Test important calls to action after saving.

Important: Changes can affect other elements or screen sizes. Review the result on both desktop and mobile before you consider the task finished.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
