How to Configure the Cookie Notice

Learn how to Configure the Cookie Notice in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Open the site settings or Builder control that governs the cookie notice, if present.

> SCREENSHOT TO ADD: Screenshot needed: Cookie notice configuration screen if available

Screenshot to capture: Cookie notice configuration screen if available.

2. **Step 2.** Review the notice wording and any available display controls.
3. **Step 3.** Save and test the visitor-facing banner in a fresh browser session.

Screenshot to capture: Visitor-facing cookie notice in a fresh session.

4. **Step 4.** Confirm the notice matches your actual cookie/privacy practices; do not assume a banner alone creates compliance.

Important: A cookie notice is not a substitute for an accurate cookie policy or any required consent controls.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
