How to Customize the Beat Browser Appearance

Learn how to Customize the Beat Browser Appearance in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Select a Beat Browser block or open its appearance settings.

> SCREENSHOT TO ADD: Screenshot needed: Beat Browser component appearance settings

Screenshot to capture: Beat Browser component appearance settings.

2. **Step 2.** Review available list/grid display, artwork and visible metadata controls.
3. **Step 3.** Check how the block behaves with real beats, search and filters.

> SCREENSHOT TO ADD: Screenshot needed: Live Beat Browser with search/filter and beat cards

Screenshot to capture: Live Beat Browser with search/filter and beat cards.

4. **Step 4.** Test mobile layout and the license action on the live storefront.

> SCREENSHOT TO ADD: YouTube demo thumbnail needed: How to Customize the Beat Browser Appearance

YouTube demo to record (2–4 minutes): How to Customize the Beat Browser Appearance. Show the full sequence in the steps above; replace this thumbnail with the real YouTube embed when ready.

Important: Beat Browser is a dynamic beat display, so test real catalog data instead of relying on an empty preview.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
