How to Preview Mobile, Tablet and Desktop Layouts

Learn how to Preview Mobile, Tablet and Desktop Layouts in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Open the device preview menu in Kong Builder.

> SCREENSHOT TO ADD: Screenshot needed: Device preview selector open

Screenshot to capture: Device preview selector open.

2. **Step 2.** Switch among desktop, laptop, tablet and mobile widths available in the menu.
3. **Step 3.** Inspect header, page sections, buttons, images and footer at each size.

> SCREENSHOT TO ADD: Screenshot needed: Same page in mobile and desktop preview

Screenshot to capture: Same page in mobile and desktop preview.

4. **Step 4.** Use a real phone to confirm the live site, then save needed fixes.

> SCREENSHOT TO ADD: YouTube demo thumbnail needed: How to Preview Mobile, Tablet and Desktop Layouts

YouTube demo to record (2–4 minutes): How to Preview Mobile, Tablet and Desktop Layouts. Show the full sequence in the steps above; replace this thumbnail with the real YouTube embed when ready.

Important: Changes can affect other elements or screen sizes. Review the result on both desktop and mobile before you consider the task finished.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
