How to Fix Mobile Layout and Spacing Issues

Learn how to Fix Mobile Layout and Spacing Issues in your BeatKongs producer website using Kong Builder. Follow the steps below in your own producer dashboard and check the result on the visitor-facing website before publishing.

Before you begin

Sign in to your BeatKongs producer account and open **Website → Edit Website**. Work on a page you can safely test. Builder controls may vary by theme, selected element and plan.

Step-by-step instructions

1. **Step 1.** Open the affected page in the mobile device preview.

> SCREENSHOT TO ADD: Screenshot needed: Mobile preview showing the layout defect

Screenshot to capture: Mobile preview showing the layout defect.

2. **Step 2.** Identify the exact element causing horizontal scrolling, overlap or excessive space.
3. **Step 3.** Inspect its width, margin, padding, positioning and visibility settings.

> SCREENSHOT TO ADD: Screenshot needed: Corrected mobile page after adjusting the cause

Screenshot to capture: Corrected mobile page after adjusting the cause.

4. **Step 4.** Correct one cause at a time and verify on a real phone before saving.

> SCREENSHOT TO ADD: YouTube demo thumbnail needed: How to Fix Mobile Layout and Spacing Issues

YouTube demo to record (2–4 minutes): How to Fix Mobile Layout and Spacing Issues. Show the full sequence in the steps above; replace this thumbnail with the real YouTube embed when ready.

Important: Mobile overflow is often caused by a single element with fixed width or excessive spacing.

How to confirm it worked

Save the page, open the visitor-facing website, refresh it, and inspect the changed section on desktop and mobile. If the task involves a link, form, player, menu or other interactive feature, test that interaction directly on the live site.

Troubleshooting

- **Cannot find the control?** Select the intended element first. Some settings only appear for certain components, themes or plans.
- **Change did not appear?** Check that the correct page was saved, refresh the live page, and check whether caching is showing an older version.
- **Mobile layout looks wrong?** Reopen device preview and inspect the affected element’s width, spacing and visibility.
- **Feature is missing or not working?** Avoid deleting working content. Use Report Issues from your producer dashboard and describe the page, control and expected result.
