Understanding the Pages Manager

Find and manage the pages that make up your producer website. Follow the steps below in your BeatKongs producer dashboard and verify the result on your live website.

Before you begin

Sign in to your BeatKongs producer account. You will use **Website → Pages**, **Website → Menus**, or **Website → Edit Website** depending on the task. If you are making a significant change, save a copy of important content first.

Step-by-step instructions

1. **Step 1.** Sign in and open Website → Pages from the producer dashboard.

2. **Step 2.** Review the page list to find an existing page by its displayed name or file name.
3. **Step 3.** Open the page you want to edit; use Edit Website for visual content changes.

4. **Step 4.** Before creating another page, check whether a page with the same purpose already exists.

Important: The Pages manager organizes website pages; the Menus manager controls which links visitors see.

How to confirm it worked

Save your changes, open **View Live Website**, and refresh the affected page. Check the correct URL, page content, and any relevant header or footer links. Repeat the check on mobile if navigation or layout was changed.

Troubleshooting

- **Page or menu item is missing?** Confirm you are in the intended producer website and that you saved the correct page or menu.
- **Link opens a 404 page?** Copy the destination from the live page instead of guessing its file path, then update the menu link.
- **Changes are not visible?** Refresh the website and check for cached content; confirm the correct header or footer menu is selected in Kong Builder.
- **Still stuck?** Use **Report Issues** from the producer dashboard and include the page title, URL, and a screenshot.
