How to Create and Edit Footer Menus

Organize useful links at the bottom of your website. Follow the steps below in your BeatKongs producer dashboard and verify the result on your live website.

Before you begin

Sign in to your BeatKongs producer account. You will use **Website → Pages**, **Website → Menus**, or **Website → Edit Website** depending on the task. If you are making a significant change, save a copy of important content first.

Step-by-step instructions

1. **Step 1.** Open Website → Menus and find or create the menu for the footer.

2. **Step 2.** Add the pages visitors need, such as contact, policies, or other site information.
3. **Step 3.** Set understandable link labels, arrange the order, and save.
4. **Step 4.** Open Kong Builder and use Footer settings to select the intended menu.

   Screenshot to capture: Footer right panel menu selection.
5. **Step 5.** Save and test the links on the live website, including mobile.

Important: Footer menu links come from Menu Manager; the footer settings control which menu is displayed.

How to confirm it worked

Save your changes, open **View Live Website**, and refresh the affected page. Check the correct URL, page content, and any relevant header or footer links. Repeat the check on mobile if navigation or layout was changed.

Troubleshooting

- **Page or menu item is missing?** Confirm you are in the intended producer website and that you saved the correct page or menu.
- **Link opens a 404 page?** Copy the destination from the live page instead of guessing its file path, then update the menu link.
- **Changes are not visible?** Refresh the website and check for cached content; confirm the correct header or footer menu is selected in Kong Builder.
- **Still stuck?** Use **Report Issues** from the producer dashboard and include the page title, URL, and a screenshot.
