How to Set Up Your Homepage Link

Make sure Home takes visitors to the correct site homepage. Follow the steps below in your BeatKongs producer dashboard and verify the result on your live website.

Before you begin

Sign in to your BeatKongs producer account. You will use **Website → Pages**, **Website → Menus**, or **Website → Edit Website** depending on the task. If you are making a significant change, save a copy of important content first.

Step-by-step instructions

1. **Step 1.** Open Website → Menus and find the header menu.

2. **Step 2.** Inspect the Home item and identify its current destination.
3. **Step 3.** Use the homepage URL shown by View Live Website or the appropriate home-page selector.
4. **Step 4.** Save the menu and open your live website.

   Screenshot to capture: Browser showing correct homepage URL after clicking Home.
5. **Step 5.** Click Home from another page and verify it returns to the correct homepage without repeating path segments.

Important: If Home opens a duplicated path or a 404 page, report the exact source and destination URLs through Report Issues.

How to confirm it worked

Save your changes, open **View Live Website**, and refresh the affected page. Check the correct URL, page content, and any relevant header or footer links. Repeat the check on mobile if navigation or layout was changed.

Troubleshooting

- **Page or menu item is missing?** Confirm you are in the intended producer website and that you saved the correct page or menu.
- **Link opens a 404 page?** Copy the destination from the live page instead of guessing its file path, then update the menu link.
- **Changes are not visible?** Refresh the website and check for cached content; confirm the correct header or footer menu is selected in Kong Builder.
- **Still stuck?** Use **Report Issues** from the producer dashboard and include the page title, URL, and a screenshot.
