**How to Preview a Theme**

This guide explains how to Preview a Theme using the BeatKongs producer dashboard.

# Where to go

**Website → Themes**

# Steps and key details

1. Open the Themes screen and locate the theme to inspect.
2. Use its preview or demo view to inspect desktop and mobile layout.
3. Check navigation and homepage links in the preview; if a link appears duplicated or broken, report it rather than assuming the theme is usable.

# Before you finish

Save your changes where applicable, then check the result on your live website or in the relevant dashboard list. If a control differs from this guide, use the current dashboard label and report the mismatch to BeatKongs Support.
