How to Optimize Images for Faster Websites

This guide explains how to Optimize Images for Faster Websites using the BeatKongs producer dashboard.

Where to go

Website → Media Library

Steps and key details

1. Resize images to the dimensions required by their placement before uploading.
2. Compress photos and consider WebP where compatible; preserve enough quality for artwork and branding.
3. Replace oversized files, then test the page on a phone and desktop.

Before you finish

Save your changes where applicable, then check the result on your live website or in the relevant dashboard list. If a control differs from this guide, use the current dashboard label and report the
