Steps and key details

1. Open Details and enter a clear beat title and accurate description.
2. Avoid including license rights that differ from your configured contract.
3. Save and check how the title appears in the beat browser.

Before you finish

Save your changes where applicable, then check the result on your live website or in the relevant dashboard list. If a control differs from this guide, use the current dashboard label and report the mismatch to BeatKongs Support.
