How to Enable or Disable a Beat

This guide explains how to Enable or Disable a Beat using the BeatKongs producer dashboard.

Where to go

Music → Manage Beats

Steps and key details

1. Locate the beat and open its status or availability controls.
2. Change its availability using the control offered by the current interface.
3. Save and verify whether it appears on the live storefront.

Before you finish

Save your changes where applicable, then check the result on your live website or in the relevant dashboard list. If a control differs from this guide, use the current dashboard label and report the mismatch to BeatKongs Support.

Review note: Some screens may change during platform development. Verify the current controls
