**How to Delete a Beat**

This guide explains how to Delete a Beat using the BeatKongs producer dashboard.

# Where to go

**Music → Manage Beats**

# Steps and key details

1. Locate the beat and check whether it has existing sales or associated files.
2. Use the available delete action and confirm only after reviewing its consequences.
3. Deleting a saved beat frees a beat slot under the current BeatKongs limit policy.

# Before you finish

Save your changes where applicable, then check the result on your live website or in the relevant dashboard list. If a control differs from this guide, use the current dashboard label and report the mismatch to BeatKongs Support.

**Review note:** Some screens may change during platform development. Verify the current controls
