**How to Configure Beat SEO Settings**

This guide explains how to Configure Beat SEO Settings using the BeatKongs producer dashboard.

# Where to go

**Music → Add Beat → SEO**

# Steps and key details

1. Open the SEO tab for the beat.
2. Enter accurate metadata appropriate to the beat and your brand using the fields shown.
3. Save and verify the public beat page; exact field names should be checked against the current editor.

# Before you finish

Save your changes where applicable, then check the result on your live website or in the relevant dashboard list. If a control differs from this guide, use the current dashboard label and report the
