How to Identify Your Top-Performing Beats

This guide explains how to Identify Your Top-Performing Beats using the BeatKongs producer dashboard.

Where to go

Music → Beat Stats

Steps and key details

1. Review Top Beats, including Title, Plays, Downloads, Favorites and Sales.
2. Compare engagement with actual purchases rather than relying on play counts alone.
3. Use the date-range filter to examine recent performance.

Before you finish

Save your changes where applicable, then check the result on your live website or in the relevant dashboard list. If a control differs from this guide, use the current dashboard label and report the mismatch to BeatKongs Support.
